

MATER-BI

LONDON 2012

A GOAL FOR OLYMPIANS: CUT NON-SEPARATE URBAN WASTE COLLECTION

MATER-BI FOR FOODSERVICE

MATER-BI is a family of fully **biodegradable and compostable** bioplastics which use renewable resources to provide a solution with low environmental impact and to solve specific environmental problems in various sectors, such as foodservice, packaging and separate collection of organic waste.

With the latest developments to certain product grades, today the MATER-BI Foodservice line is complete.

Plates, glasses, cutlery, bowls, finger food mini cups, drinking straws, ice cream cups and spoons, lids for cups: a sustainable proposal for an environment friendly policy in various commercial and contract catering contexts.

All products are suitable for food contact and are certified compostable to the UNI EN 13432 standard.

Cups and containers with lids

Cutlery

Separate waste collection at the Olympics

THE LONDON 2012 OLYMPICS

composting process	1,700 tonnes
success ratio	63%
Products supplied	
cups branded McDonald's and Coca-Cola	10 million
